

Essential Dermatology

This meeting is supported by an unrestricted Educational Grant

What you need to know about skin in a one day course

Essential Dermatology for GPs

- Up to 25% of all GP consultations relate to the skin
- Dermatology is an area of medicine that is facing major changes from secondary to primary care
- The majority of GPs have little or no training in dermatology
- Hospital referral rates for dermatology are consistently high

The Primary Care Dermatology Society is an independent educational organisation of GPs with an interest in dermatology. We have more than 1300 members nationwide representing GPs as well as GPwSIs.

For 18 years we have provided a comprehensive and varied mixture of educational meetings for our members and additional day long meetings for those with limited knowledge in dermatology e.g. VTS, new GPs as well as those who missed out on dermatology training.

This series of 9 full day Essential Dermatology and Level 2 meetings is in response to demands of VTS organisers and those involved in developing primary and intermediate care services. The programme covers the essential information to enable a GP (plus some dermatology nurse practitioners) to cope with the vast majority of conditions encountered in day-to-day general practice. Level 2 covers a wider range rather than a more complex level of topics.

Stephen Kownacki
PCDS Executive Committee Chairman

Dates for 2013
